

Way to Remote access, choose your Internet Network:

Local Area Network	Dial-Up Network
<p>a. If you are using Internet Explorer: select “Tool” and select “Internet Settings”</p> 	<p>a. If you are using Internet Explorer: select “Tool” and select “Internet Settings”</p> 
<p>b. Select “Connections” in the pop-up window and select “LAN Settings”</p> 	<p>b. Select “Connections” and select “Broadband Dial-Up” (you may have your own name for it)</p> 
<p>c. Select “use automatic configuration script”, and enter “http://120.126.115.54/proxy.pac”. Please make sure other options are not selected and press Enter. The system will ask for account number and password. The account number will be your student number or staff number, and the default password is the last 4 digits of your personal ID number.</p>	<p>c.
